INSTITUTIONAL PRESENTATION

# Who We Are

We are a Brazilian company consisting exclusively of Brazilian capital founded 20 years ago.

Specializing in designing and manufacturing professional cleaning equipment and accessories, Bralimpia Equipamentos over the course of these two decades endeavored and was able to become a company solid enough to operate at a high level in this important segment of the global economy.

Our headquarters cover more than 20,000 square meters of built area and are home to our main factory, administration and logistics.

All our departments are integrated to lend more speed and efficiency to our processes.

We utilize modern ERP and CRM software solutions that give us complete control over all our operations and qualify our company as a strategic partner of the industry's largest companies in Brazil and around the world.

## Our Team

With our 310 employees and vast network of exclusive third-party suppliers, we at Bralimpia Equipamentos are always investing in our plants to achieve excellence not only in our line of products, but in developing and training our professionals as well.

Our sales department has a solid network of representatives that manage our relationships with both distribution channels and the companies that make up our customer base.

## Events and Fairs

**HIGIEXPO 2018**  
São Paulo - Brazil

To expand our customer base and obtain all the competitive advantages available, Bralimpia invests in participating in fairs and events in Brazil and other countries where we do business.

We participate actively in the most important fairs of different Brazilian and worldwide industries where we can showcase our solutions and create two-way communication channels that can add to the quality of our field surveys and allow us to develop products and services that are increasingly more relevant to our customer base.

Furthermore, we hold workshops and training programs for different profiles of users and representatives, spreading our applied knowledge and improving cleaning systems and their maintenance across different countries.
